Our raw materials are especially chosen as OEKO-TEX certified. The materials have been scientifically tested for the presence of harmful substances and are a better and safer choice for your health. Textiles carrying the OEKO-TEX® MADE IN GREEN label are produced more sustainably in socially responsible workplaces.

By choosing FYRPRO® firefighter protective clothings, you get many advantages

FYRPRO® series fireman suits are guaranteed for 12 months according to the terms and conditions of our company. We trust our product and guarantee that our protective clothings are free from defects in material and workmanship for a period of 1 (one) year.

FYRPRO® series fireman suits have lots of advantages through its favorable construction;

- International requirements: specialised equipment according to the international standards
- Quality: focusing on the best items in the market
- Breathability: protecting moisture barrier from wet without losing breathability
- Reduced heat stress: thermal barrier enhancing protection against heat
- Durability: qualified technical fabrics
- Comfort: lightweight and flexible during extended wear
- Freedom of movement: mobility in dangerous firefighting situations

Firefighting is a tough job. It is essential to focus on important details. FYRPRO® offers you the highest protection with a special design gaining above advantages via using top quality materials. It allows your body breathe and supplies you comfort during extended periods of wear. Not letting the increase of your body temperature during firefighting applications, lowers your heat stress. This is an extensive experience FYRPRO® provides you.

Lifetime of FYRPRO® garments

In general, there are no legal restrictions on the duration of use of firefighter suits.

Although it varies according to the way of use, the basic rule (without guarantee) is the use of a garment.

It can be assumed that the average lifespan is 10 years.

This life is calculated based on various levels of use recorded by fire brigades.

In addition, after 10 years, there will be an opportunity to buy a garment using the latest technologies in the light of technological developments and care should be taken in this regard.
