SAFETY LTD

About Us

Since 1979, we produce equipments for;

OCCUPATIONAL HEALTH AND SAFETY
FIRST AID & CIVIL DEFENSE
FIRE & CBRN & PERSONAL PROTECTION.

Our headquarters and factory are located in Ankara. With our network of distributors spread all over the country and worldwide we distribute our best and high quality service to customers in the shortest time.

Our company has TS EN ISO 9001 Quality Certificate. All our products are certified according to international standards. With the high quality products we manufacture, our export sales increase day by day.

What We Do

We provide variety of special services you may need.

Consultation

IST provides complete information on the design, use, supply and care of industrial heat and flame protective workwear / underwear / balaclavas, electric arc protective clothings, fireman suits, aluminized fire proximity/entry suits, air cooled kiln entry clothings, functional and thermal underwears/t-shirts. Our experienced team will provide you the best economical solution with customized size dimensions, preliminary study and technical drawings.

Quality and Safe Product Selection

Our product range has a wide range of standard and optional designs. We provide special protective clothing solutions suitable for work areas, that do not compromise protection while providing ease of movement.

Special Engineering Solutions

Each garment is designed for different purposes and has different certificates. A protective garment cannot substitute another. The most suitable and most appropriate solution must be determined according to the protection level and area of use. In IST® textile production workshop, fabrics are cut by using licensed cloth spreading software to combine the best designs with the best stitching properties with same pattern in all sizes and to prevent the possibility of encountering an error. IST® is fully equipped to offer and produce standard and special designed garments according to your needs.

Complementary Accessories Selection

Complementary elements of protective clothing are of great importance for full protection. You can easily choose and gather the most suitable complementary materials that can be specially used with the protective clothing you purchased such as; personal protective equipments like head, face, hand, respiratory, foot protectors, from our range. Our expert team will guide you in choosing your protective garment and choosing a complementary accessory with the most appropriate international standards for your working area.

Pre-Sales Support and Modelling

Before production, we design your protective clothing in our advanced technical drawing softwares according to your preferences and submit to your approval. Protective clothings that are purchased because of their high protection levels, but are unsuitable for the working facility may not provide adequate protection and may result in high costs for your company. Appropriate personal protective equipment should be determined as a result of risk analysis by experts. In this regard, our technical team will work in coordination with experts in your facility.

Standards and Certification

All our products are fully tested by notified bodies in Europe according to the relevant European standards and certified according to the relevant EN standards. In selection of protective clothings, labels inside the suit must be examined well, labels must be printed in accordance with European standards. The information on the label must be verified with certificates. In this regard, our expert technical team will provide consultation to you valuable customers.

After-Sales Support

Our company provides the necessary information, training and solutions to its customers on the maintenance, use and periodic controls of purchased products. Our company gives repair services for all standard and/or special design protective clothings that are damaged, or have worn parts. In this sense, it is aimed that the user can use the existing product for a long time instead of buying new product. Our sales representatives can provide training on the use of the products. All of our products are warranted against production and workmanship defects for a period of 24 months.

Please contact our sales department for detailed information about our services.

For such serious equipments, working with an experienced company that values human health and manufactures in accordance with international standards will be the right choice for your facility, your employees and your safety.
