

Rectangular Snip

**SOLUTION 4**  
Ralrax International Co.

#### • **Solution 4**

uses and In firefighting operations, there are many cases where different tools with different uses and demands are needs at the same time. It is very important to combine different situations along with the measurement of inter-pathway pressure.

**Solution 4** has the ability to collect and divide simultaneously In four directions.

The fact that one or more suppliers can support one or more consumers In different directions at the same time makes the device possible for the firefighters to operate even In the opposite direction of the consumer or supplier.

**Solution 4** creates exactly the same possibility.

This device, which is compatible with BS and Storz standards, helps firefighters to extinguish fire even In two or three different directions and In 360° with different sizes of connections.

**Solution 4** tested In 60 barg and able to operate on 25 barg and below pressures.

## Solution 4

uses and In firefighting operations, there are many cases where different tools with different uses and demands are needs at the same time. It is very important to combine different situations along with the measurement of inter-pathway pressure.

Solution 4 has the ability to collect and divide simultaneously in four directions. The fact that one or more suppliers can support one or more consumers in different directions at the same time makes the device possible for the firefighters to operate even in the opposite direction of the consumer or supplier.

Solution 4 creates exactly the same possibility. This device, which is compatible with BS and Storz standards, helps firefighters to extinguish fire even in two or three different directions and in 360° with different sizes of connections. Solution 4 tested in 60 barg and able to operate on 25 barg and below pressures.
