

EVACUATION AND TRANSPORT

PEGASUS

EVACUATION TRIANGLE

Pegasus is the advanced KONG evacuation triangle for rescue.

Designed for a very easy and rapid evacuation of injured person; very low weight (690g).

Its **15 independent attachment loops** make it adaptable, rapidly and safely, to all body sizes from children to adults.

This product, **max. load 200Kg**, guarantees its use also for overweight people.

Pegasus is **conform to EN 1498:2006 class B** and to **EASA Certification Memorandum CM-CS-005**.

It is also **EAC certified**.

The rear handle can be used to connect a guide rope or to insert in the cabin the retrieved person.

The supplementary shoulder straps (# 873.10) allow the use of Pegasus in narrows and difficult places (ladders, tunnels, etc).

Universal size, made in Italy of strong Nylon and Cordura.

New carriage bag, ergonomic, compact and equipped with attachment point for harness or helicopter winch.

Available on request in black version.

High quality, made in Italy!
