

A firefighter in full gear is using a LUKAS eDRAULIC WATERTIGHT EXTRICATION TOOL to lift a car out of water. The tool is a blue and white hydraulic rammer, and the firefighter is wearing a blue and yellow striped uniform. The car is partially submerged in the water, and the firefighter is standing on the edge of the vehicle. The background is a dark, rainy night scene.

eCXT

eDRAULIC WATERTIGHT
EXTRICATION TOOL

eDRAULIC. POWERFUL. WATERTIGHT.

The full LUKAS eWXT range is finally complete.

Our eDraulic Watertight Extraction Tools offer the proven powerful performance, high speeds, and safety of LUKAS rescue tools, combined with the technological advancements of an axial piston pump, an electromagnetic service valve, and a brushless electric motor. These are now complemented by our latest innovation: all eWXTs can now be used in case of heavy rain, flooding, and even underwater. All technical component are watertight on its own. All eWXTs thus fulfill the requirements of protection category IP 58 and can be operated underwater at a depth of 3m for up to one hour.

The series includes the watertight 5 Ah or 9 Ah rescue battery, both offer the longest operating time available in the industry. These batteries can even be changed underwater if necessary.

PRODUCT INFORMATION

> WATERTIGHT

- All technical components are watertight on their own
- All eWXTs fulfill the requirements of protection category IP 58
- Can be operated underwater at a depth of 3 m for up to one hour

> 5 Ah / 9 Ah BATTERIES

- Watertight 5 Ah battery
- Watertight 9 Ah battery: the most powerful one on the global market
- Improved handling of insertion and locking mechanism
- Both batteries offer the longest operating time available in the industry
- Can even be changed underwater if necessary

> THE CONTROL VALVE

- Proven star grip with simple handling

> THE BRUSHLESS ELECTRIC MOTOR

- Less noise emission and longer lifetime
- More torque and more power – with smaller dimensions
- A minimum of mechanical wear-and-tear parts
- Lower energy consumption and thus longer runtime with one battery charge
- Electronic speed control ensures that the working speed of the unit remains constant up to maximum load

> THE AXIAL PISTON PUMP

- Less noise emission
- More compact design – shorter tool length
